

Auping Noble

Understated luxury

The Auping Noble is an elegant and luxurious design bed, created by Dutch designer Johan van Hengel. Defined by its generous proportions, solid oak frame and refined details, Noble brings a sense of calm, comfort and understated luxury to the bedroom. Its wide wooden frame, softly rounded corners and integrated bedside tables create a distinctive and timeless silhouette that feels both contemporary and inviting

Benefits

■ Iconic design

The Noble is designed around the idea of “modest luxury” where craftsmanship, natural materials and thoughtful details take centre stage. The solid oak frame forms the foundation of the design, while the upholstered headboard and large lounge cushions add softness and warmth. The layered composition creates a welcoming space that is as beautiful as it is functional, making the bedroom feel like a place to relax, unwind and recharge.

The bed features two lounge cushions that are attached to the headboard. Spanning the full width of the mattress, they create a comfortable space to sit back, relax and unwind. Whether you're reading a book, enjoying your morning coffee or simply taking a moment for yourself, the soft cushions provide exceptional support and comfort. The cushions can be upholstered in any fabric from the Auping collection.

■ Sleeping Comfort

Designed for both sleeping and lounging, the Noble offers exceptional comfort through its supportive construction and generous upholstered cushions. The integrated lounge cushions provide the perfect place to read, relax or enjoy a quiet moment, while compatibility with Auping's mattresses and mesh bases ensures excellent ventilation, ergonomic support and a restful night's sleep.

■ Sustainably Made

Crafted in Deventer, the Netherlands, the Noble is made from sustainable oak, carefully selected from European forests. By combining durable materials with timeless design, Auping creates a bed that is built to last for generations. The focus on quality craftsmanship and responsible production contributes to a more sustainable way of living and sleeping.
