

Auping mesh base

For optimal ventilation, comfort and support

A great night's sleep starts with the perfect foundation. Designed to work seamlessly with your mattress, Auping bed bases provide exceptional support, comfort, and ventilation for a better sleeping environment.

Every Auping bed base features our signature mesh design: a unique woven steel structure that remains exceptionally open. This innovative construction promotes continuous airflow around your mattress, helping to regulate temperature and moisture for a fresh and comfortable sleep experience.

Looking for even more comfort? Our adjustable bed bases allow you to tailor your sleeping and lounging position to your personal needs.

Auping mesh base

For optimal ventilation, comfort and support

Benefits

■ Best ventilating bed base

Thanks to its unique design, the mesh base offers up to 80% open air space. This ensures maximum airflow around the mattress, making it the best ventilating bed base available. Better ventilation means moisture is removed faster, keeping the mattress fresh, hygienic, and more durable.

■ Optimal support

The diagonal mesh, with its 10,000 support points, ensures perfect support. The diagonal mesh, adapts precisely to the contours of the body. This ensures even pressure distribution, perfect spinal alignment, and relief for sensitive areas such as shoulders and hips.

■ Long lifespan

The mesh base is crafted from reinforced, high-quality steel, making it exceptionally strong and durable. Its robust construction is designed to withstand decades of use without losing stability or support. Unlike wooden slats or other bases that may weaken over time, the mesh base maintains its shape and resilience, ensuring consistent comfort year after year.

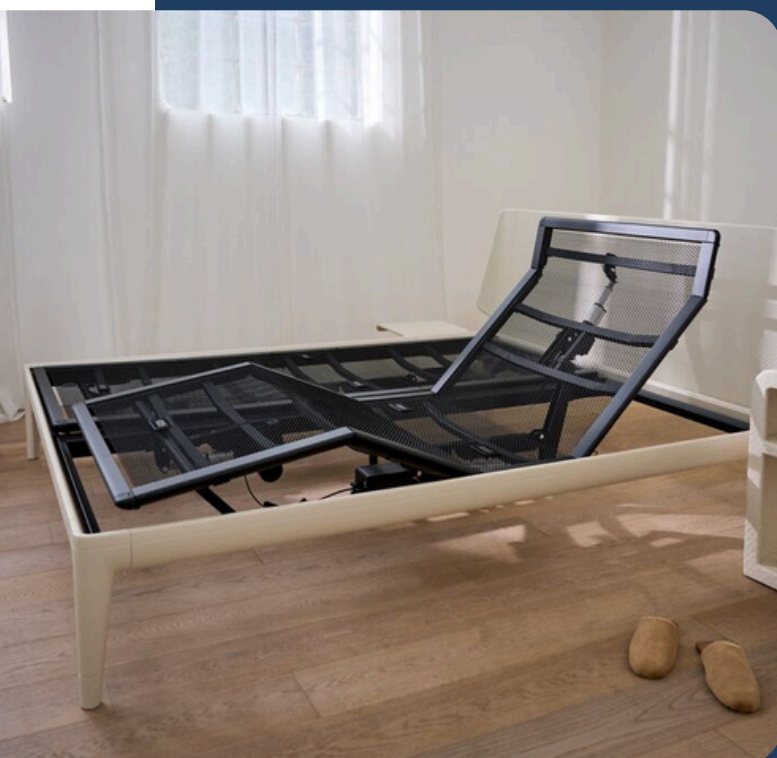

■ Adjustability

Our mesh bases are also available in an adjustable version, allowing you to personalise your comfort with ease. Whether you are looking for additional support for your lower back, or simply a more relaxing position for reading, streaming your favourite series, or enjoying breakfast in bed, an adjustable base adapts to your needs.

Choose the level of adjustability that suits your lifestyle: elevate the back section, adjust the head section for optimal neck support, raise the legs, or combine all three for the ultimate personalised comfort experience.

Product features

Ventilating

Because the mesh base has 80% open space for air, it ventilates better than every other bed base.

Support

The transversely stretched mesh, with its 10,000 support points, provides excellent support.

Strong

The mesh base is made of hard-wearing steel so you can dream away on it for a lifetime.

Adjustable

Our mesh bases also come adjustable. You can choose exactly what you want to adjust: the back, the legs, or the head.

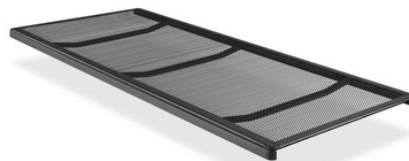

Auping mesh base

Available in various sizes, with widths ranging from 70 to 200 cm and lengths from 190 to 220 cm.

Mesh base options

■ Mesh base flat

Our flat mesh base is a cross-tensioned mesh foundation. A good bed base is essential for optimal sleep. By giving both you and your mattress the best possible support, you can enjoy sweet dreams every night.

■ Mesh base manually adjustable

The manually adjustable mesh base features both a back and foot section that you can easily adjust by hand. If you want to adjust your bed without motors underneath, this base is the perfect solution.

Adjustable back section – manually adjustable in 13 positions

Adjustable foot section – manually adjustable in 6 positions

■ Mesh base adjustable 1M

The adjustable base 1M has a back section that can be adjusted electrically and a foot section that can be adjusted manually.

Because of the spacious seating part of the mesh base, you will always be comfortable.
